REDEFINE THE WAY YOU COMMUNICATE

CASE ACCEPTANCE STARTS WITH AN IMAGE

Carestream Dental intraoral cameras are leading the way to improved diagnostic capabilities and patient education. They are also redefining the way you communicate: high-quality images enable your patients to better understand their clinical situation and help you clarify case details with insurance companies. These intraoral cameras provide the powerful visual evidence you need to get the treatment process started.

CS 1500 INTRAORAL CAMERA

Available in both wired and wireless models, the CS 1500 gives you the high-resolution images you need—from portrait to macro views—to diagnose, plan treatment and start the conversation.

- True liquid lens autofocus
- 8-LED auto-adjusting lighting system
- Focus range of 1mm to infinity
- Image or video capture capability

Wired version connects via USB; wireless version supports AV, VGA and S-video connections.

High quality images in a wide range of views.

CS 1200 INTRAORAL CAMERA

Combining high-quality images, ease of use and multiple connections for easy sharing, the CS 1200 is the perfect entry-level intraoral camera option. It features an auto-adjustable, 6-LED lighting system and a generous 3mm-25mm focus range.

- Stores up to 300 images
- Eliminates the need for memory cards or computers in each operatory
- Supports PC, video and analog displays

High quality images capture cracks, caries and other anomalies.
